SATISFACTION

A GRADUATE'S
MESSAGE
TO LIBRARY

“The biggest gains in the library may come in stages. In the past few years, I generally studied by myself here. The quiet environment of the library has provided me with great help in my self-study, which is also an important reason for me to make progress in my study. Then in the year of graduation, my graduation team and I completed our graduation project in the library. Our graduation design is based on a seat detection device in the library, so the seats and some equipment in the library also gave us a lot of help.”

— Huang, ZJUI

Computer Engineering, Grade 17
